

MCA 502 Advanced Operating System

Date: 2083/04/25 & 29

S.N	Roll .No	Student Name	Presentation Topic
1	1/082	Abhisekh Shakya	Fundamentals of multiprocessor systems
2	2/082	Ananta Poudyal	CPU scheduling and load balancing in multiprocessor systems
3	3/082	Arjun Shrestha	Synchronization and communication in multiprocessor systems (techniques such as locks, semaphores, and message passing),
4	4/082	Basu Dev Lamichhane	Memory management in multiprocessor systems (issues such as cache coherence and memory consistency).
5	5/082	Bibek Rawat	Real-time systems
6	6/082	Bishal Rijal	Fundamentals of multiprocessor systems
7	7/082	Bipin Paudel	CPU scheduling and load balancing in multiprocessor systems
8	8/082	Deepa Bhutyal	Synchronization and communication in multiprocessor systems (techniques such as locks, semaphores, and message passing),
9	9/082	Deepak Gautam	Memory management in multiprocessor systems (issues such as cache coherence and memory consistency).
10	10/082	Deepak Pandey	Real-time systems
11	11/082	Ishwori Khatri	Fundamentals of multiprocessor systems
12	12/082	Milan Karki	CPU scheduling and load balancing in multiprocessor systems
13	13/082	Naresh Rawal	Synchronization and communication in multiprocessor systems (techniques such as locks, semaphores, and message passing),
14	14/082	Navnit Dangi	Memory management in multiprocessor systems (issues such as cache coherence and memory consistency).
15	15/082	Nicolas Bhandari	Real-time systems
16	16/082	Nischal Dahal	Fundamentals of multiprocessor systems
17	17/082	Nischal Joshi	CPU scheduling and load balancing in multiprocessor systems
18	18/082	Nischal Rai	Fundamentals of multiprocessor systems
19	19/082	Rupesh Man Amatya	Memory management in multiprocessor systems (issues such as cache coherence and memory consistency).
20	20/082	Sajan Dawadi	Real-time systems
21	21/082	Sandesh Giri	Synchronization and communication in multiprocessor systems (techniques such as locks, semaphores, and message passing),
22	22/082	Sandesh Khanal	CPU scheduling and load balancing in multiprocessor systems
23	23/082	Sandhya Maharjan	Synchronization and communication in multiprocessor systems (techniques such as locks, semaphores, and message passing),
24	24/082	Santosh Kumar Karki	Memory management in multiprocessor systems (issues such as cache coherence and memory consistency).
25	25/082	Shailesh Khadakathoki	Real-time systems
26	26/082	Sijan Bhandari	Fundamentals of multiprocessor systems
27	27/082	Srijana Pandey	CPU scheduling and load balancing in multiprocessor systems
28	28/082	Subash Sharma	Synchronization and communication in multiprocessor systems (techniques such as locks, semaphores, and message passing),
29	29/082	Sushila Lamichhane	Memory management in multiprocessor systems (issues such as cache coherence and memory consistency).
30	30/082	Tilak Subedi	Real-time systems
